

## Type SB5 Load Cell

Flintec load cells are designed to meet the most stringent accuracy requirements. Certifications have been obtained from Weights & Measures Authorities, worldwide.

SB5 load cells are available in the capacities 5 kN to 100 kN (510 kg to 10197 kg) and include Accuracy Classifications GP, C1 and C3 according to OIML R 60; NTEP  $n_{max}=5000$ .

They offer stainless steel construction and improved potting, making them suitable for use in tough industrial environments.

The unique “blind” loading hole combined with the available Flintec loading hardware provides an excellent price-performance ratio.

It allows very low profile platform design and offers advantages in all kinds of weighing applications.

The Flintec calibration technique (in  $mV/V/\Omega$ ) eliminates time consuming corner calibration in multiple load cell systems.

The SB5 is available for use in hazardous areas zone 1, 2 (gas) and 21, 22 (dust) according to EEx ia IIC T6...T4 T150°C ATEX.
